PROFESSIONAL SUMMARY

Full-stack software engineer with 4+ years of experience building software and delivering IT solutions for organisations of every size, in government and the private and public sectors. I design and ship enterprise platforms, health tech systems, inventory and point-of-sale software, custom business applications and AI products. I use prompt engineering and AI tools every day to build LLM-powered features and deliver faster.

- Building ECN-SORMS, an all-in-one operations platform for the Energy Commission of Nigeria
- Founded and lead Acies Africa Technologies, a registered IT solutions company
- Co-founder and full-stack developer of GidaHaven (gidahaven.com), a live property platform for Africa
- 19 production systems delivered across healthcare, hospitality, education, energy and retail

CORE SKILLS

Frontend
React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Bootstrap, HTML5, CSS3

Backend
Node.js, Express, NestJS, PHP, Laravel, CodeIgniter, Python, Django, FastAPI, Flask, REST APIs

AI & Prompt Engineering
Prompt engineering, LLM API integration, chatbots, AI automation, TensorFlow, PyTorch, Scikit-learn, Hugging Face, OpenCV

Data
MySQL, MongoDB, SQL, schema design, query optimisation

Design
UI/UX for web and mobile apps, landing pages, dashboards, design-to-code

IT & Support
Git/GitHub, agile delivery, QA testing, networking, CCTV installation, IT consultation, technical support, virtual assistance

PROFESSIONAL EXPERIENCE

Senior Software Engineer, ICT Department (NYSC)

May 2026 – Present

Energy Commission of Nigeria

- Building ECN-SORMS (Smart Operations & Resource Management Software), one platform for HR, asset management, document management, attendance, clinic management and KPI tracking.
- Supporting system architecture, technical documentation and deployment for a national government agency.
- Replacing paper-based and disconnected processes with one shared, trackable system across departments.

Tools: PHP, MySQL, enterprise architecture

Founder & Lead Engineer

2024 – Present

Acies Africa Technologies

- Lead an IT solutions company (CAC registered, 2026) serving government, healthcare, education, hospitality and SMEs.
- Designed and built Hospital, Hotel, Inventory & Pharmacy, HR, POS and School Management systems for paying clients.
- Lead development of an Events Ticketing & Management System with QR tickets, check-in and payments.
- Built AI customer support chatbots with prompt engineering and LLM APIs, with human handover when needed.
- Deliver web solutions, IT consultation and CCTV installations; lead a team including a CTO and Chief Data Officer.

Tools: React.js, Node.js, MongoDB, Laravel, CodeIgniter, Django, MySQL, LLM APIs

Co-Founder & Full-Stack Developer

Present

GidaHaven (gidahaven.com)

- Full-stack developer for the platform: built the frontend, backend, database and admin tools for the live platform.
- Co-building a trusted property platform for Africa, launching in Abuja before expanding across Nigeria.
- Building map and area search, verified agent profiles, reviews, photo and video listings, and chat-based home matching.

Junior Software Engineer

Feb 2025 – Present

Swavy Global (Remote)

- Develop hotel management and reservation features with live availability and booking workflows.
- Built and tested FoodExpress.ng, keeping features stable and the UI consistent across releases.
- Work in a distributed team using Git, agile sprints and code reviews.

Tools: PHP, CodeIgniter, JavaScript, Git

Software Engineering Intern

2024

Unitech Drilling Company

- Built and deployed a Mud Motor Tracking System to monitor drilling equipment performance.
- Automated weekly and monthly operational reports, replacing manual spreadsheet workflows.

Tools: PHP, JavaScript, SQL

Technical Support & Virtual Assistant

2023 – Dec 2024

Swavy Global (Remote)

- Supported live web deployments and client systems, including education portals.
- Managed data entry, reporting dashboards, client communication, troubleshooting and live chat support.

Frontend Development Intern

2021 – 2023

Swavy Global

- Built a journal publishing website and improved the FoodExpress.ng frontend.
- Built websites for brands and companies.

Tools: HTML, CSS, Bootstrap, JavaScript

SELECTED PROJECTS

ECN-SORMS	All-in-one HR, asset, document, attendance, clinic and KPI platform for a federal agency
AI Customer Support Chatbot	LLM chatbot built with prompt engineering that answers from a business's own data
Face Recognition Attendance	Computer-vision system that logs attendance in real time (Django, TensorFlow)
Hospital Management System	Patient records, appointments, pharmacy, lab results and billing
HR, POS & School Systems	Payroll and staff records; cloud sales and stock; enrolment and results
Events Ticketing Platform	QR tickets, dashboards, check-in and payments (React, Node.js, MongoDB)
Car Rental Management	Fleet, booking, pickup and return management (Node.js, TypeScript)

EDUCATION

B.Sc. Software Engineering

Nov 2021 – Oct 2025

Topfaith University

- Data structures, algorithms, machine learning, database systems and web development.
- Final-year project: CNN-based Face Recognition Attendance System.
