PROFILE

Full-stack software engineer who builds software and delivers IT solutions for organisations of every size, in government and the private and public sectors. My work covers health tech (hospital and clinic management), inventory and point-of-sale systems, custom-built business applications, CCTV and camera installation, IT consultation, and AI and machine learning applications such as chatbots and face recognition. Founder of Acies Africa Technologies, co-founder of GidaHaven, and currently serving my NYSC year at the Energy Commission of Nigeria, where I am building ECN-SORMS.

EXPERIENCE

Software Engineer, ICT Department (NYSC)

May 2026 – Present

Energy Commission of Nigeria

- Building ECN-SORMS (Smart Operations & Resource Management Software), one platform for HR, asset management, document management, attendance, clinic management, KPI tracking and more.
- Supporting system architecture, technical documentation and deployment workflows for a national government agency.
- Replacing paper-based and disconnected processes with one shared, trackable system.

Stack: PHP, MySQL, enterprise architecture

Co-Founder

Present

GidaHaven: property platform for Africa (gidahaven.com)

- Co-building a trusted property platform for Africa, launching in Abuja and then expanding across Nigeria.
- Shaping map and area search, verified agent profiles, reviews, photo and video listings, and chat-based home matching.
- Driving a free-listing model for agents: no publishing fee, no commission, with storefronts and listing stats.

Founder & Lead Engineer

2024 – Present

Acies Africa Technologies (CAC registered, January 2026)

- Founded an IT solutions company serving government, healthcare, education, hospitality and SMEs. Services include web solutions, custom software, health tech, AI solutions, IT consultation, and CCTV and camera installation.
- Built Hospital, Hotel, Inventory & Pharmacy, HR, POS and School Management software for real clients.
- Leading development of an Events Ticketing & Management System (React.js, Node.js, MongoDB).
- Grew the team to include a CTO and Chief Data Officer, expanding into government, real estate and legal software.

Stack: CodeIgniter, Laravel, Django, React, Node.js, MongoDB, MySQL, CCTV systems

Junior Software Engineer

Feb 2025 – Present

Swavy Global · Remote

- Contributed to hotel management and reservation system development with live availability and booking workflows.
- Built and tested FoodExpress.ng, keeping features stable and the UI consistent across releases.
- Worked in a distributed team using Git, agile practices and structured version control.

Stack: PHP, CodeIgniter, JavaScript, Git

Software Engineering Intern
2024

Unitech Drilling Company

- Built and deployed a Mud Motor Tracking System for monitoring drilling equipment performance.
- Automated weekly and monthly operational reports, replacing manual spreadsheet workflows.
- Improved data consistency and traceability across field operations.

Stack: PHP, JavaScript, SQL, HTML/CSS

Technical Support / Virtual Assistant
2023 – Dec 2024

Swavy Global · Remote

- Supported live web deployments and client-facing systems, including education portals.
- Managed data entry pipelines, reporting dashboards, client communication, troubleshooting and live chat support.

Frontend Development Intern
2021 – 2023

Swavy Global

- Developed a journal publishing website and improved the FoodExpress.ng frontend (June – Oct 2023).
- Built websites for brands and companies (2021 – 2022).

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, Tailwind CSS, Bootstrap, HTML5, CSS3
Backend	Node.js, Express, NestJS, PHP, CodeIgniter, Laravel, Python, Django, FastAPI, Flask, REST APIs
AI & Data	TensorFlow, PyTorch, Scikit-learn, Hugging Face, OpenCV, CNNs, chatbots, MySQL, MongoDB
Infrastructure	CCTV & IP camera systems, networking, Git & GitHub, Agile, QA testing

SELECTED PROJECTS

ECN-SORMS: HR, assets, documents, attendance, clinic, KPIs in one system. PHP, MySQL

GidaHaven: property platform for Africa with verified agents. Web platform

AI Customer Support Chatbot: answers questions from a business's own data. Python, NLP

Face Recognition Attendance: real-time CNN attendance logging. Django, TensorFlow

Hospital Management System: records, pharmacy, lab, billing. CodeIgniter, MySQL

HR Management Software: records, payroll, performance. CodeIgniter, MySQL

Cloud POS Software: real-time retail sales and stock. Django

Events Ticketing & Management: QR tickets, check-in, payments. React, Node.js, MongoDB

School Management Software: enrolment, timetables, results. CodeIgniter, MySQL

Car Rental Management System: fleet and bookings. Node.js, TypeScript

Hotel Management System: live availability and bookings. CodeIgniter

Inventory & Pharmacy, Restaurant, Real Estate CRM CodeIgniter, PHP

Mud Motor Tracking System: drilling equipment analytics. PHP, SQL

Journal Publishing Website PHP, Laravel · **FoodExpress.ng** CodeIgniter

EDUCATION

B.Sc. Software Engineering
Nov 2021 – Oct 2025

Topfaith University

- Data structures, algorithms, machine learning, database systems and web development.
- Final-year project: CNN-based Face Recognition Attendance System. Peer mentor to junior developers.

INTERESTS

AI and machine learning, open source, tech podcasts, mentoring, gaming and music.
